"B" cameras on hand	6	6	6	6	6	6
Needed to support man	9	9	11	11	11	11
Additional required	3	3	5	5	5	5
Replacement cost - <input type="text"/>						
Cost of Model 333 <input type="text"/>						
Trackers on hand	10	10	10	10	10	10
Needed to support man	9	9	11	11	11	11
Additional required	0	0	1	1	1	1
Cost <input type="text"/>						
Other						
Dayton processor on hand	3	3	3	3	3	3
Needed to support man	3	3	4	4	4	4
Additional required	0	0	1	1	1	1
Cost each <input type="text"/>						
Total Cost <input type="text"/>						

2. Remarks:

"B" cameras currently in the inventory have been operated several hundred thousand cycles and despite M & O procedures have reached the level of weariness where occasional component failures may occur. Better lenses, more advanced shutters and film handling techniques, developed during the past several years make it advisable to consider replacement of the "B" cameras with a more advanced type or to support a product improvement program that

would give the "B" camera a higher resolution capability. The Hycon Model 333 is a completely new camera currently being procured by the U. S. Air Force [redacted] Additional cameras of this type may be bought at [redacted] but delivery will be probably on the order of nine months from date of order, due to the lead time required for lens procurement.
